"Ammonia corrosion testing of photovoltaic (PV) modules"

Factory Inspection

To document the consistent quality of the product factory inspections are performed periodically.

- Ammonia resistance tested
- Periodic inspection

Remarks:

- The details of the factory inspection are documented in report no. 21179402.001.
- Valid in conjunction with TÜV Rheinland certificate acc. to IEC EN 61215 and **only** for the material combination as listed in the above mentioned test report.
- New module type designation.

Conditions:

The product test is voluntarily according to technical regulations. Any change of the design, materials, components or processing may require the repetition of some of the qualification tests in order to retain type approval. Accordingly the repetition of the tests that are basis of this certificate may be required.

The certificate is valid until 25 October 2016.
