

Solar pool pump TFD96-012-18000 with controller unit

Features

The TFD96-012-18000 solar pool pump works for various type systems, included but not limited to pool water circulation, drinking water, living water and irrigation agriculture.

Product highlights

- » The brushless non-sensor motor improves the efficiency a 25% compared with traditional alternating systems.
- » High reliability and life cycle, great efficiency and 3 years of workshop warranty.
- » Protected against environment.
- » Max. pressure: 2,5 bar
- » Max. water temperature: +60°C

Included accessories

- » Pump controller
- » Cable connector
- » Water level sensor
- » Solar module cable

Pump performance	
Model	TFD96-012-18000
Power	750W
Voltage	96V
Max. flow rate	18m ³ /h
Max. impulsion	12m
Max. suction	3m
Outlet size (in and out)	3" x 3"
Controller model	TFM96-750 (included)
